Professional Summary

Front-end / Full Stack Developer with over 2 years of experience in web applications using React, Next.js, and Node.js. Experienced in developing scalable interfaces, ERP systems, process automation, and REST API integrations. Strong background with SSR/SSG architectures, Docker, CI/CD, and VPS deployment. Focused on performance, high conversion rates, clean architecture, and user experience (UX).

Education

Universidade Estadual do Sudoeste da Bahia (UESB) — Vitória da Conquista, BA
Bachelor's Degree in Computer Science — **Expected Graduation: December 2027**

Professional Experience

Grupo Fellow — Mar 2026 – Present
Front-end Developer — Remote

- Lead the creation and maintenance of all interfaces within the company's digital ecosystem.
- Developed the main lead generation landing page using Next.js and React with SSR and SSG architectures, ensuring instant loading to handle high traffic volumes.
- Built screens for **Fellow Pay** and management dashboards, creating frictionless, conversion-focused checkout journeys.
- Integrated the front-end with .NET/C# microservices, translating complex business rules into highly scalable, accessible, and intuitive interfaces.
- Created and maintained a reusable component library to unify the visual and technical standards across the group's applications.

Freelance — Dec 2024 – Present
Full Stack Developer — Remote

- Developed custom ERP systems focused on business management, dashboards, and data integration.
- Eliminated **100%** of duplicate reservations in the "Gerência Pousada" system by implementing real-time concurrency control.
- Created **SEO-optimized** landing pages, generating **5 new patients/month** through organic traffic.
- Developed custom solutions for inventory control, cash flow management, and cloud storage.
- Maintained and optimized legacy systems, improving overall performance and user experience.

Grupo Mercadótica — Aug 2023 – Dec 2024
Web Development Intern — Vitória da Conquista, BA

- Automated internal processes, reducing processing time from **4 days to 4 minutes**.
- Implemented real-time chat using WebSockets, reducing response time from **15 to 6 minutes**.
- Developed responsive user interfaces using React, Next.js, and TypeScript.
- Handled backend development with Node.js and Prisma, validating APIs via Postman.

Relevant Projects

Mercadótica Intranet
Internal system for process automation and corporate communication.
Technologies: React, Node.js, WebSockets

My Best Vision
Platform for managing lenses and optical processes with catalog automation.
Technologies: React, Node.js, PostgreSQL

Casa Jardine
SEO-optimized landing page for an event space, focused on customer conversion and venue presentation.
Technologies: Next.js, React, SEO, CSS modules

Pousada Itu Admin (ERP)
Reservation management, financial control, and lodging automation system.
Technologies: React, Firebase, Axios, WebSockets

Cristiane - Psychologist
SEO-optimized landing page focused on patient conversion.
Technologies: Next.js, SEO, Performance Optimization

Technical Skills

Languages & Frameworks: React.js, Next.js, Node.js, TypeScript, JavaScript, HTML, CSS.
UI & Styling: Material UI, ShadCN, Styled Components, Framer Motion, GSAP.
Backend & Databases: PostgreSQL, Prisma, Firebase, REST APIs.
Tools & Infrastructure: Docker, Git, GitHub Actions, Postman, WebSockets.
Cloud & DevOps: VPS, Hetzner Cloud, CI/CD, IaaS.
Concepts: Clean Architecture, SOLID, Performance Optimization, Responsive Design, Unit Testing.
Artificial Intelligence: Claude Code, Codex, Google stitch.
Methodologies & Languages: Scrum, AI SEO, Portuguese (Native), English (Intermediate).
